DR JANAKI RAMAN'S COUNSELLING

The counselling offered by Dr. Janaki Raman focuses on how to achieve great aspirations and the measures necessary to do so.

COMMUNICATE EFFECTIVELY : When we reach a high positions in life, we must talk effectively in speeches, interviews, and other public settings. We sound professional in any position we are in when we have the appropriate voice modulation and communication abilities.

SELF-MOTIVATION is the second step to achieving a huge dream. The best kind of motivation in life comes from within us, not from others, " Since this form of inspiration cannot be obtained from anybody else, we should have it within us. It is our responsibility to achieve our huge desire, so we should inspire ourselves to do so!

SELF-CONFIDENCE is the following trait. Being confident in our actions is a good thing, but never overconfidence, as this could prevent us from accomplishing our huge dreams. We should only seek out for our own confidence and not rely on the confidence of others. Therefore, if you are self-assured, your third flag is already up.

DR JANAKI RAMAN'S COUNSELLING

TIME MANAGEMENT is the following station. To schedule ourselves and our downtime, we should manage our time. We ought to adhere to a specific schedule that occupies us. Every night, go over everything on your schedule that isn't finished, and be sure to get it done the following day. Important advice: Don't push yourself too hard to finish everything on time, be a little relaxed, and take plenty of time to rest.

DISCIPLINE is the last one, but certainly not least! No matter how much money you have, having discipline is what really qualifies you for success. You should demonstrate this to everyone you meet. Your last flag has been raised, and you are prepared

STUDENT COUNCIL

WHAT IS STUDENT COUNCIL?

A Student Council is a representative body of students in a school or college that advocates for student interests and concerns. Elected by their peers, council members act as a liaison between students and school authorities, organizing events and initiatives while promoting student engagement and leadership. Their main goal is to actively shape the school community and contribute to a positive learning environment. Let's hear from the new leaders about their success.

WORDS FROM OUR HEAD BOY AND GIRL

I feel proud of the teamwork and collaboration with my fellow student leaders and teachers. Together, we have accomplished meaningful projects and addressed important issues raised by students.

Despite the occasional stress, the satisfaction of seeing the positive outcomes of our efforts outweighs any difficulties. The support from friends, teachers, and the school community has been invaluable, and it motivates me to continue striving for excellence in my role as head boy.

—KESHAV(HEADBOY)

Initially participating in the election, I aimed to gain exposure and guide fellow students. Despite not receiving any posts, I was announced as the head girl alongside Sahana, a dream far from reality. It felt like reaching out to the night sky, trying to grab a glimmering star despite knowing I couldn't.

EL NIÑO

INCREASING OR DYING

Do you know about El niño. . El niño is weather phenomena which refers to a warming of the ocean surface, or above-average sea surface temperatures, in the central and eastern tropical Pacific Ocean. The low-level surface winds, which normally blow from east to west along the equator ("easterly winds"), instead weaken or, in some cases, start blowing the other direction (from west to east or "westerly winds"). El Niño recurs irregularly, from two years to a decade, and no two events are exactly alike. El Niño events can disrupt normal weather patterns in the United States and globally. .

El Nino - Effects on India

In a normal monsoon year (without El Nino), the pressure distribution is as follows.

The coast of Peru in South America has a higher pressure than the region near northern Australia and South East Asia.

The Indian Ocean is warmer than the adjoining oceans and so, has relatively lower pressure. Hence, moisture-laden winds move from near the western Pacific to the Indian Ocean.

The pressure on the landmass of India is lower than on the Indian Ocean, and so, the moisture-laden winds move further from the ocean to the lands.

If this normal pressure distribution is affected for some reason, the monsoons are affected.

IS EL NIÑO INCREASING OR DYING ?

INCREASING OF EL NIÑO:

EL NIÑO IS A NATURAL CLIMATE PHENOMENON CHARACTERIZED BY THE PERIODIC WARMING OF SEA SURFACE TEMPERATURES IN THE CENTRAL AND EASTERN EQUATORIAL PACIFIC OCEAN. IT IS PART OF THE LARGER EL NIÑO-SOUTHERN OSCILLATION (ENSO) CLIMATE PATTERN, WHICH ALSO INCLUDES LA NIÑA, THE COOLER PHASE. EL NIÑO EVENTS TYPICALLY OCCUR EVERY TWO TO SEVEN YEARS AND CAN LAST SEVERAL MONTHS.

DURING AN EL NIÑO EVENT, THE WARMER OCEAN TEMPERATURES HAVE FAR-REACHING EFFECTS ON WEATHER AND CLIMATE AROUND THE WORLD. SOME OF THE COMMON IMPACTS OF EL NIÑO | IMPORTANT TO NOTE THAT EL NIÑO EVENTS HAVE SIGNIFICANT IMPLICATIONS FOR VARIOUS SECTORS, INCLUDING AGRICULTURE, WATER RESOURCES, ENERGY, AND PUBLIC HEALTH. HOWEVER, PREDICTING THE EXACT TIMING AND INTENSITY OF AN EL NIÑO EVENT CAN BE CHALLENGING, AND SCIENTISTS USE SOPHISTICATED MODELS AND HISTORICAL DATA TO MAKE FORECASTS.

WHILE ON THE OTHER HAND SOME SAY THE EL NINO WEATHER CONDITION HAS WEAKENED CONSIDERABLY OVER THE PAST MONTH AND IS NOW PROJECTED TO FADE AWAY IN A MONTH OR TWO, THE LATEST UPDATE FROM US WEATHER AGENCIES SAID NINO, THE NAME GIVEN TO ANOMALOUS HEATING IN THE EAST AND CENTRAL EQUATORIAL PACIFIC, GENERALLY WEAKENS THE INDIAN MONSOON. INDIAN MET OFFICIALS SAID EL NINO'S PRESENCE MAY HAVE IMPACTED THE MONSOON IN JUNE, WHICH ENDED WITH A 33% DEFICIENCY.
